Reuben George Thomas *Full-Stack Web Developer*

✉ reubengeorgethomas@gmail.com   ⬉ reubengt.github.io   ◯ /reubengt   in /in/reuben-george-thomas

Profile

An ambitious and empathetic developer equally comfortable with user centred prototyping and full-stack development. Learns new tools quickly on the job, and thrives in a culture of transparent knowledge sharing.

Professional Experience

Founders and Coders, *Course Facilitator*

January 2022 – July 2022

Coordinated two cohorts of learners at the Founders and Coders bootcamp.
- Assisted in curriculum delivery (Node.js, React, Next.js, PostgreSQL).
- Updated the website to communicate the shift from being an employment agency to an apprenticeship provider.
- Built automations using GitHub Actions to simplify manual tasks like repo setup, issue creation and assignment of workshop pairs/project teams.
- Reached out to book speakers, additional mentors etc.

Time to Spare, *Full Stack Developer* ⬈

October 2020 – October 2021

Time to Spare builds tech to connect the voluntary sector.

- Built a self service checkout app for food banks with Next.js and Firebase.
- Implemented a custom form creation system with complex state management.
- Created webhook integrations with third party APIs (Mailchimp)
- Paired with and mentored a newly hired apprentice developer on a delivery route planning feature for food banks.

Aplisay, *Full-Stack Developer* ⬈

July 2020 – September 2020

Part of a team building a frontend interface for aplisay connect, a tool that allows non technical small business owners to create an AI based telephone answering agent.

- Set up complex form state management using useReducer() and React Context.
- Worked with react-query to manage asynchronous api requests and client side caching.
- Contributed to the design system, which uses css modules and css variables.

Autsera, *Frontend Developer*

December 2019

Github Repo ⬈ **Live Website** ⬈
An interactive point and click adventure game built for autsera.com ⬈ to provide social skills training for children with autism.

- Created a scalable system to add more levels by using React Router in combination with several reusable components and JSON game data.
- Facilitated sprint planning for a team of 4 developers via a github kanban board.

Skills

Frontend
HTML+CSS
JavaScript
React
Next.js
TailwindCSS
Styled Components

Backend
Node
Express
PostgreSQL
Firebase
Serverless Functions

Testing
Jest
React Testing Library
Cypress

Education

Founders And Coders
2019
Highly-selective 18 week Full-Stack JavaScript coding bootcamp.

Interests

Music Production
Spends downtime playing guitar & making beats.
